

HTML Table Borders

[< Previous](#)[Next >](#)

HTML tables can have borders of different styles and shapes.

How To Add a Border

To add a border, use the CSS `border` property on `table`, `th`, and `td` elements:

Example

```
table, th, td {  
  border: 1px solid black;  
}
```

[Try it Yourself »](#)

Collapsed Table Borders

Example

```
table, th, td {  
  border: 1px solid black;  
  border-collapse: collapse;  
}
```

[Try it Yourself »](#)

Style Table Borders

If you set a background color of each cell, and give the border a white color (the same as the document background), you get the impression of an invisible border:

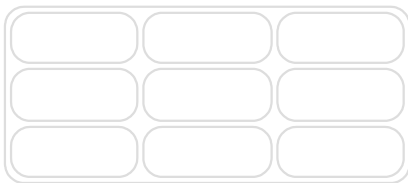

Example

```
table, th, td {  
  border: 1px solid white;  
  border-collapse: collapse;  
}
```

[Try it Yourself »](#)

Round Table Borders

With the `border-radius` property, the borders get rounded corners:

Example

```
table, th, td {  
  border: 1px solid black;  
  border-radius: 10px;  
}
```

[Try it Yourself »](#)

Skip the border around the table by leaving out `table` from the css selector:

Example

Dotted Table Borders

With the `border-style` property, you can set the appearance of the border.

The following values are allowed:

- `dotted`
- `dashed`
- `solid`
- `double`
- `groove`
- `ridge`
- `inset`
- `outset`
- `none`
- `hidden`

Example

```
th, td {  
  border-style: dotted;  
}
```

With the `border-color` property, you can set the color of the border.

Example

```
th, td {  
  border-color: #96D4D4;  
}
```

HTML Exercises

Test Yourself With Exercises

Exercise:

Use the correct CSS border values to create a solid black 3 pixels border on a table element.

```
table, th, td {  
  border:           ;  
}
```
